

Marine Insurance

Those in the marine business know how different theirs is from land-based businesses. Even the maritime language itself is different. So too are the risks confronted and the ways of dealing with them. Only a brokerage specializing in marine-oriented solutions can offer the full range of services necessary to navigate through the hazards of the marine industry. Wells Fargo Insurance Services is unique in its services, experience, and knowledge, and our reputation is unmatched.

Whether your business owns or operates commercial vessels, fishing boats, or yachts; transports cargo by sea, air, or land; or otherwise supports the marine industry, our marine professionals have the knowledge to provide innovative solutions. We represent a wide range of organizations and individuals in the maritime industry, providing cost-effective solutions for challenging exposures as well as emerging risks.

At Wells Fargo Insurance Services, we also provide our customers with an unfair advantage over the competition—a partnership that gives them unrivaled access to worldwide insurance markets and the leverage needed to fully represent their interests with strong underwriters.
